OREGON-GROWN TULIP BULBS

We have been supplying the trade on these bulbs with remarkable results. Our stocks mature from 10 days to two weeks earlier than the import bulbs and will produce correspondingly earlier blooms either in forcing or for outdoor use. A trial will convince you as to the merits of our Tulip Bulbs.

We can highly recommend our Second Size Tulip Bulbs for forcing in Cold Frames or in a Cold House.

We want only satisfied customers and will absolutely guarantee satisfaction.

NARCISSI—DAFFODILS

The producing of the Highest Quality Forcing Bulbs is no longer an experiment with us, for we have been supplying the trade with daffodil bulbs for the last ten years with the very best of results. We find that in our contacts with the forcing trade, there usually

exists a shortage of good stock during the period following the Christmas Holidays. Daffodil bulbs grown in our section will produce a maximum of bloom from January 1 on or during a period when the grower is able to realize a good profit on his investment.

LILIUM REGALE

Our Regale Lily bulbs will be ready for delivery by November 1st. May we book your order at this time for later delivery?

Why not try a few of these bulbs for forcing? The Florists who have tried them, either in pots or in the bench, have had wonderful results as they make a beautiful pot plant, or are ideal to use as cut stock for your shop trade. If you have never grown the Regal it will pay you to send us a trial order.

For greenhouse use we would recommend a bulb averaging in size from 7 to 9 inches. Also would advise planting on arrival of bulbs.

For counter sale and resale for outdoor blooms, any of the sizes listed below will produce fine flowers. Of course the larger the bulb the more blooms to the spike.
